

Project Archaeology Educator Workshops

Learn first-hand how to help your students practice the basics of inquiry-based learning through cross-curricular lessons that teach archaeology and cultural understanding.

Archaeology is an excellent tool for cross-curricular education. Subjects covered in the workshops will include **science, mathematics, social studies, history, language arts, geography, and the arts.**

Participants will receive full instruction in archaeological science for the classroom and the award-winning curriculum guide *Project Archaeology: Investigating Shelter* for grades 3 - 5 or *Project Archaeology: Investigating Nutrition* for grade 6.

All K-12 educators are encouraged to apply. Many concepts within each curriculum can be taught across all grade levels.

Educators employed in SC public school districts may be eligible to receive **professional development credit** for attending a Project Archaeology workshop. Please contact your district's coordinator for pre-approval of credit.

Workshops will take place from 8:30am - 5pm at the Parker Annex Archaeology Center (2025 Barnwell Street, Columbia, SC 29201). Lunch will be provided for free.

Choose 1 of 4 Workshops

Investigating Shelter
Saturday, April 6, 2019
Saturday, June 8, 2019

Investigating Nutrition
Saturday, May 11, 2019
Saturday, June 15, 2019
